

SERIES: HNHX Hydraulic Mounting Nuts

TensionPro Hydraulic **HNHX** nuts are designed to give quick and easy mounting operations for bearings and tapered shaft assemblies.

HNHL nuts have smooth bores and are used in marine and heavy industry for mounting bearings, gears and propellers onto tapered shafts.

HNHM nuts have threaded inside diameters and are optimised for bearing mounting operations. They are interchangeable with HMV type nuts.

Suitable for use with TensionPro stock ranges of hydraulic pumps and hoses.

HNHX are available on extra quick delivery times from our fast production facility.

The nuts have a special surface treatment to give excellent anti-corrosion and anti-wear performance

The nuts generate high loads and have extra piston stroke to give versatile use for many applications.

- Anti-wear and anti-corrosion surface treated
- Lifting eyebolts
- 400-800 bar operating pressure
- Long stroke
- Latest seal technology
- Fitted with Quick Connector outlet
- Comprehensive operating manual
- Special designs available
- Quick delivery
- Optimised load to size ratio

HNHM	-	Threaded
HNHL	-	Plain Bore
