IN STOCK FOR QUICK DELIVERY

HHRH hose reel and stand is made from stainless steel with secure forklift bearer base,

The reel is supplied with multiple lengths of high pressure flexible hose to suit the working depth.

The oil feed from the pump is to the end of the reel shaft through a self sealing quick connect nipple. The inner end of the hose is attached to the reel shaft.

The hoses, which have stainless steel ends, are connected together using stainless steel fittings.

The last hose is fitted with a self sealing quick connect coupling.

The complete reel is fitted with hoses and oil filled. It is pressure tested and supplied complete with test certification.
