

Repair and Spares Service

144 Years+ Experience

TensionPro have a repair and spares capability based on the industry leading engineering team with collectively over 144 years of tensioner design and manufacture experience.

All Makes and Models

We supply spares to suit all brands and models of tensioners including:

- ITH
- Hydratight
- Tentec
- MOCK
- Boltight
- Schaaf
- SPS
- SPX
- Pilgrim
- SKF

Sealing Technology

We supply seals with the latest materials and technology for superior long life, no-leak, performance. We can also supply seals for other brands to the same dimensions and material specifications as the original seal.

Our expertise includes supply of old legacy equipment for which the original manufacture no longer exists. We supply to the original specification, or can update to a modern specification as required.

Interchangeable Metal Parts

TensionPro can reverse engineer tensioner parts to be interchangeable with the original supply. All verified and safe to use by our experienced design team and manufactured from certified materials within our ISO9001 manufacturing system.

- Pullers
- Sockets
- Hydraulic Cylinders
- Bridges

High Pressure Fittings

We stock and supply the largest inventory of high pressure adaptors, couplings, nipples, valves and more for all main industry standards and pressure classes. If we don't stock it we can always source or design and manufacture special requests.

Radial Fit Coupling Bolts

TensionPro's specialist HYCOBOLT division reverse engineer old supply hydraulic coupling bolts and sleeves to be interchangeable with the original supply. We also supply compatible hoses, pump and oil injection adaptors. All verified and safe to use by our experienced design team and manufactured from certified materials.
