

Tool Repair and Refurbishment Services

TensionPro's has extensive knowledge and experience of hydraulic bolt tensioners and all types of high-pressure equipment. We offer a complete tool repair, refurbishment and upgrade services that covers all types, makes and models of hydraulic bolt tensioners, radial fit coupling bolt equipment, hydraulic nuts, pumps, hoses and ancillary equipment.

Continuous use of bolt tensioners will reduce reliability. Periodic test, inspection and seal replacement keeps tools working like new. Equipment that has not been used for sometime, or has no traceable test certification, benefits from a complete inspection and refurbishment to ensure the equipment is safe and meets latest pressure equipment regulations.

Our service includes:

- Record and index inventory of received items
- Complete tool strip down
- Thorough clean. Shot blast or chemical bath as required
- Damage inspection
- Inspection report to customer
- Fitting of new seals and components
- Pressure testing
- Certification

High pressure equipment must be treated with respect. If your equipment doesn't have a valid test certificate, do not use it. Send it to us for our **CERTIFIED REFURBED** service.

At the end of the process we will certify any work carried out and CE Mark equipment that has been upgraded to meet the requirements of the European Pressure Equipment Directive.

Pump and gauge calibration

We provide pump pressure test and gauge calibration certificates for all makes and models. We provide full point to point rise and fall calibration certification

Pressure Systems Safety Regulations (2000)

As a user of high pressure equipment there are specific legislative requirements that you need to follow. We can advise you on this to keep your equipment safe and properly certified.

Cyclic and Fatigue Testing

We provide computer controlled cyclic pressure testing and studies with our PLC controlled test chambers.

Complete offering:

- 700-4000 bar
- All makes and models
- Hydraulic Tensioners
- Hydraulic Pumps
- Radial Fit Coupling Bolt Equipment
- Hydraulic Jacks
- Hydraulic Hoses
- Complete tools kits
